

Market research carried out by SLP on a worldwide basis showed the need for a High Quality T5 lighting control louvre with the following attributes.

- Consistent dimensional accuracy
- Consistent product stability
- Consistent high quality metalised surfaces with a choice of finishes
- Consistently durable in transit, use and maintenance
- Little or no assembly requirement
- Longevity and low maintenance
- Instant availability from local stocks
- High LOR output
  - Genuine low glare compliance with LG3
  - Innovative design and manufacturing
  - 'State of the Art' solution

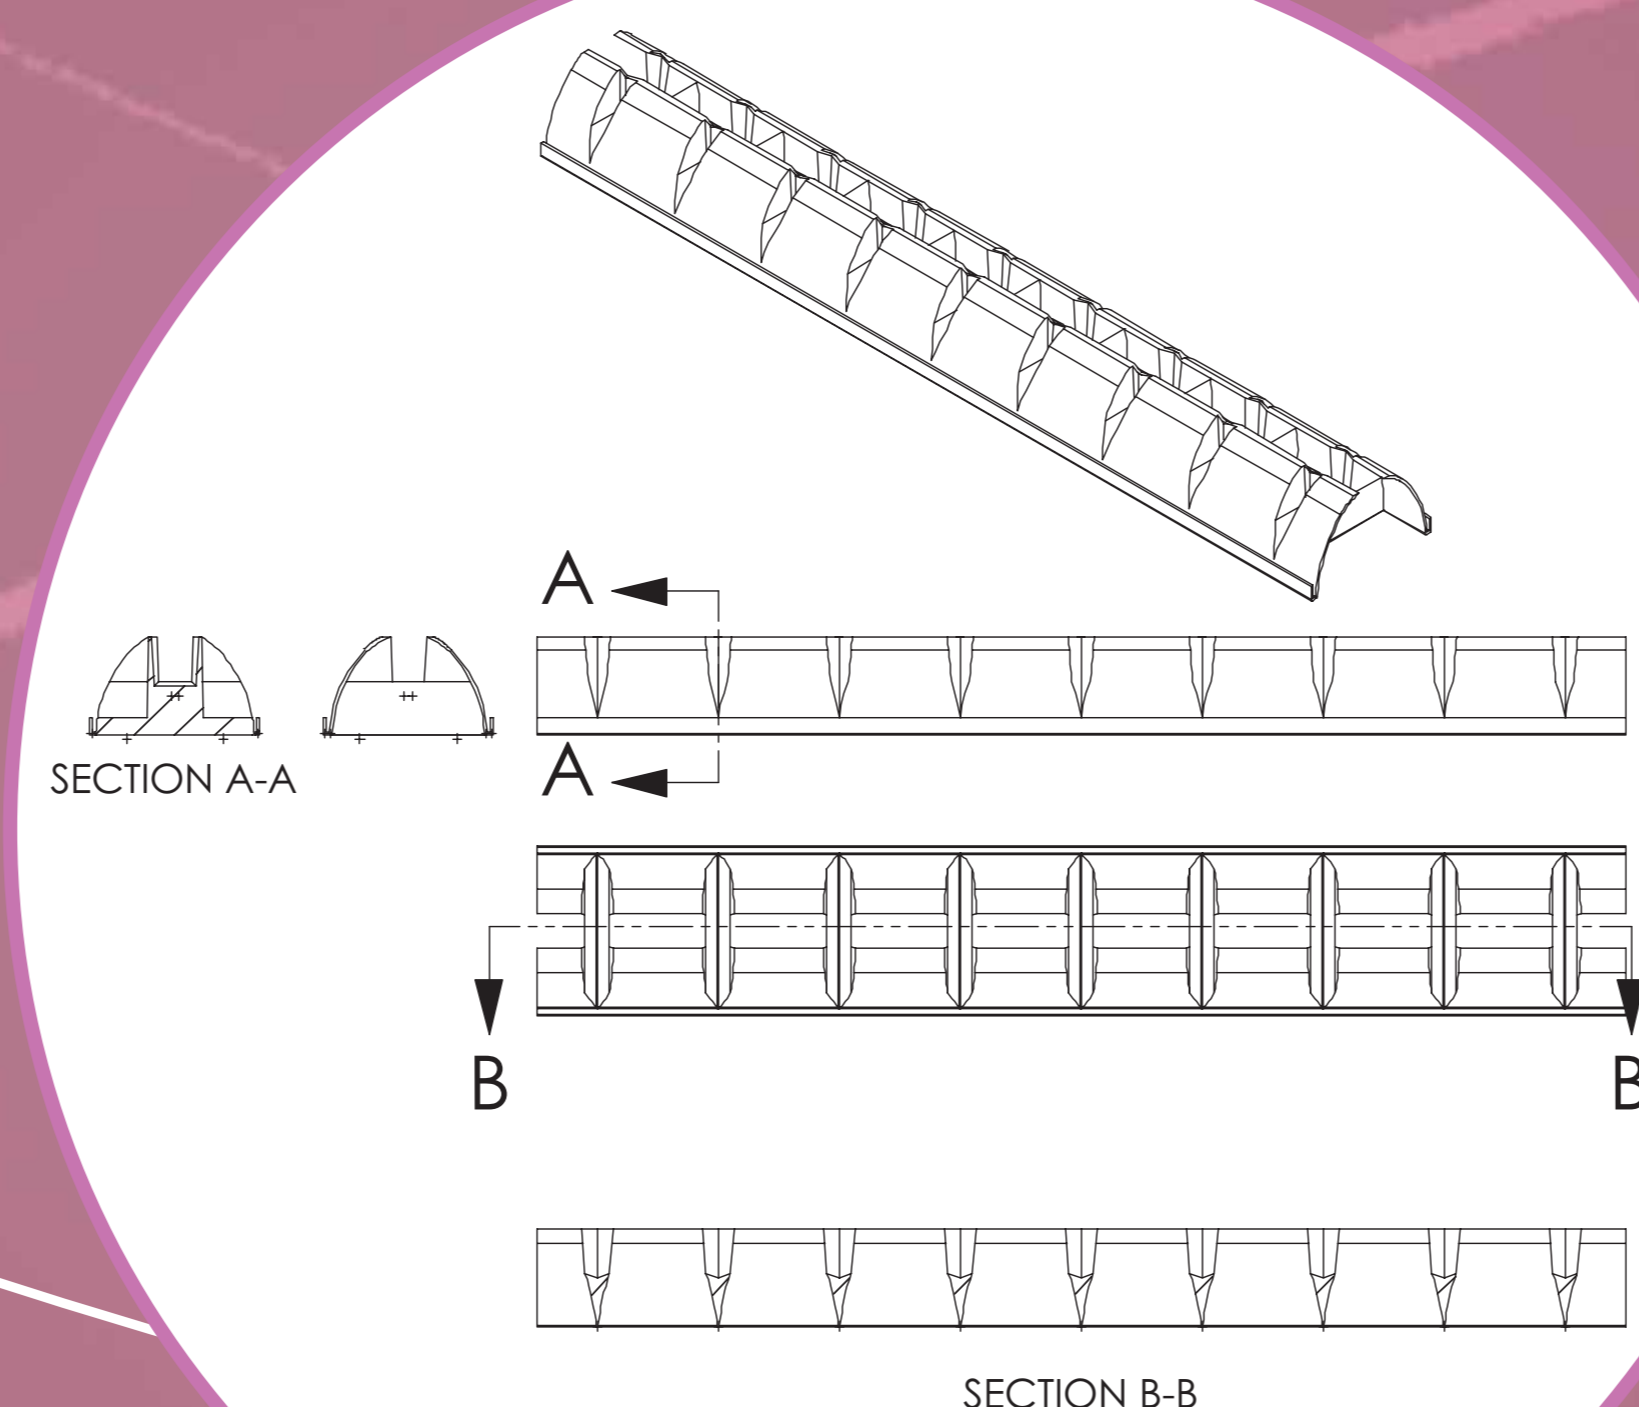

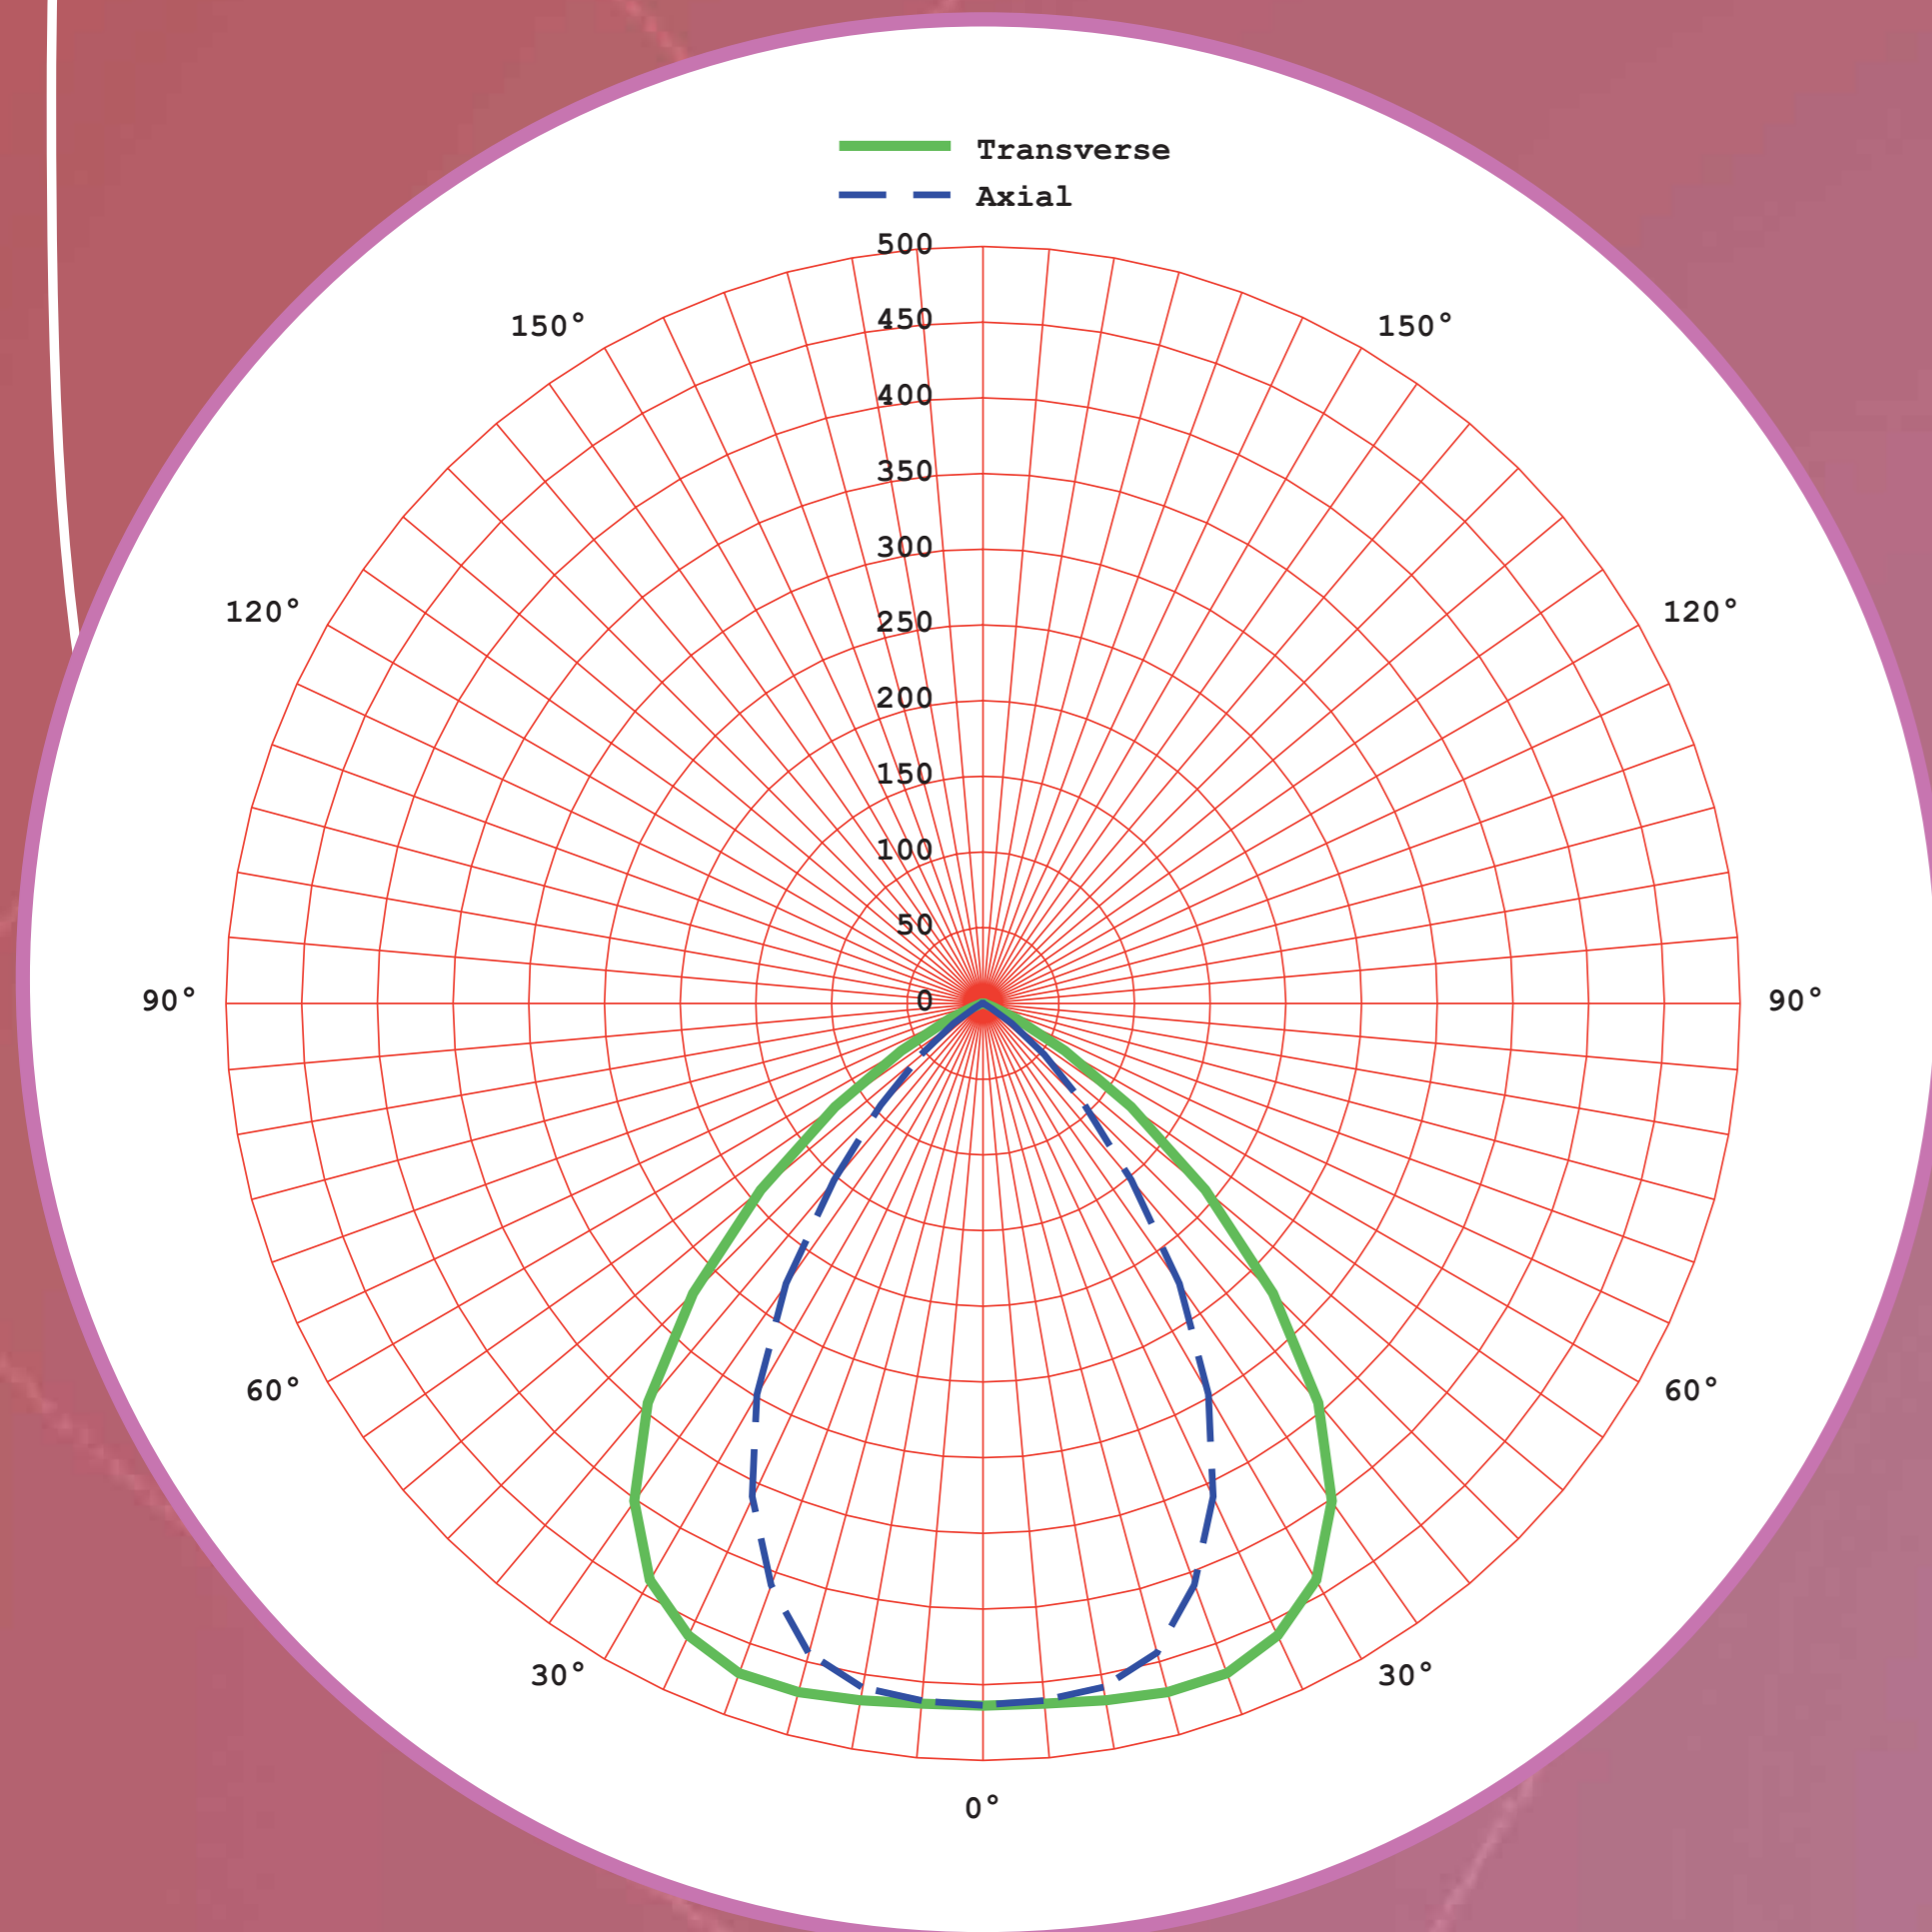

# T5 louvres

Innovation by SLP and 42 Partners working together has resulted in an innovative and 'state of the art' solution.

- High precision injected plastic one piece part
- Consistent dimensional accuracy, stability and quality excellence
- Superior metalised surface finish similar to post anodised quality
- Choice of 3 finishes – Full Specular, Semi Specular and Gold
- Full LG3 compliance
- High LOR in excess of 75%
- Permalux surface coating for long life and low maintenance
- No assembly required
- Material options – Polycarbonate and economical Polystyrene
  - Compliance with Building and Fire Codes
  - Universal fitting to most luminaires
  - Competitive cost when compared with Aluminium versions
    - Instant availability
